Injuries Crop Dmg **ILLINOIS**, South (IL-Z088) UNION, (IL-Z089) JOHNSON, (IL-Z090) POPE, (IL-Z092) ALEXANDER, (IL-Z093) PULASKI, (IL-Z094) MASSAC 01/01/13 00:00 CST 0 Drought 01/12/13 06:00 CST 0 The drought which began in May of 2012 officially ended across the remainder of southern Illinois. Water supplies returned to normal. **GALLATIN COUNTY --- 2.0 S JUNCTION [37.69, -88.23]** 01/12/13 14:30 CST 0 Heavy Rain 01/12/13 17:30 CST 0 Source: Trained Spotter Some small streams were out of their banks, and a few rural roads were under water in spots. A trained spotter measured 1.4 inches of rain in three hours. The 24-hour rainfall total was 4.90 inches. MASSAC COUNTY --- 3.8 NE UNIONVILLE [37.16, -88.50] 01/12/13 14:30 CST 15K Thunderstorm Wind (EG 56 kt) 01/12/13 14:30 CST 0 Source: Public At Hohman Lake, trees and power lines were blown down. A johnboat sank. A supercell thunderstorm developed along a quasi-stationary front that extended from southwest to northeast along the Lower Ohio River Valley. Deep and strong southwesterly wind flow stretched from Texas to the Great Lakes region ahead of an expansive upper-level trough over the western and central states. Several weak disturbances tracked northeastward, contributing to the development of the isolated supercell. The supercell produced heavy rainfall and an isolated wind damage event. WAYNE COUNTY --- FAIRFIELD MUNI ARPT [38.38, -88.42] 01/12/13 20:00 CST 0 Heavy Rain 01/12/13 21:00 CST 0 Source: Trained Spotter Water was reported to be running over County Road 900 North. PERRY COUNTY --- CUTLER [38.03, -89.57] 01/12/13 20:45 CST 0 Heavy Rain 01/12/13 22:00 CST Source: Trained Spotter 0 Water was reported over roads in town and just west of town. SALINE COUNTY --- 1.2 SW PANKEYVILLE [37.69, -88.55], 0.8 SSW PANKEYVILLE [37.69, -88.53] 01/12/13 21:36 CST 10K Thunderstorm Wind (EG 56 kt) 01/12/13 21:36 CST 0 Source: Unknown Part of a barn roof was ripped off, a tree and light pole were blown down, and some light objects including a trampoline were blown around. Power lines were down on Highway 145. JEFFERSON COUNTY --- 1.9 S WOODLAWN [38.30, -89.03], 1.7 S DRIVERS [38.31, -89.00], 1.1 SSW DRIVERS [38.32, -89.01], 1.4 S WOODLAWN [38.31, -89.03] 01/12/13 21:45 CST 0 Flash Flood (due to Heavy Rain) 01/13/13 03:00 CST 0 Source: Trained Spotter Water was over the roadway on Illinois Highway 15. WABASH COUNTY --- MT CARMEL [38.42, -87.77] 20K Thunderstorm Wind (EG 61 kt) 01/12/13 22:15 CST 01/12/13 22:15 CST 0 Source: Emergency Manager Numerous power lines were blown down in the city, along with many trees. Some metal debris was wrapped around a telephone pole.

FRANKLIN COUNTY --- 0.4 WSW BUCKNER [37.98, -89.03], 0.4 NW BUCKNER [37.98, -89.03], 0.8 NNE CHRISTOPHER [37.98, -89.05], 0.5 NW URBAIN

The rubber roof was lifted from the county courth	ouse. The roof was partially rem			er lines were blown down. A large

The rubber roof was lifted from the county courthouse. The roof was partially removed from a second structure. Power lines were blown down. A large awning was blown off, and two plate glass windows were blown out in the downtown area. A trained spotter measured a wind gust to 68 mph.

A line of thunderstorms intensified as it moved east from Missouri. The storms increased as they moved into slightly more unstable air associated with a strengthening low level jet. The storms were aided by the approach of a strong upper level trough. Despite weak instability, winds of 90 knots in the lowest 3 kilometers coupled with extreme shear values resulted in damaging winds and isolated tornadoes with the strongest storms. Ahead of the thunderstorms, strong southerly gradient winds gusted up to 55 mph in spots. A wind gust to 53 mph was measured in Hamilton County ahead of the storms.

INDIANA, Southwest

WARRICK COUNTY CHANDLER [38.05, -87.37], 1.6 WNW CHANDLER [38.06, -87.40], 2.3 NNE STEVENSON [38.05, -87.42], 1.1 NE STEVENSON

Water was reported running across Boonville-New Harmony Road, which is a well-travelled state road. The flooding was just east of Highway 65.

VANDERBURGH COUNTY --- 5.1 SSE EVANSVILLE [37.91, -87.53]

01/12/13 16:29 CST 0 Funnel Cloud

01/12/13 16:29 CST 0 Source: Trained Spotter

A rain-wrapped funnel cloud was reported over Ohio River bottomland. The funnel cloud was observed from the intersection of Interstate 164 and U.S. Highway 41.

During the afternoon, a supercell thunderstorm developed along a quasi-stationary front that extended from southwest to northeast along the Lower Ohio River Valley. Deep and strong southwesterly wind flow stretched from Texas to the Great Lakes region ahead of an expansive upper-level trough over the western and central states. Strong low and mid-level wind fields supported the formation of the supercell, which spawned a funnel cloud near the Ohio River. Later on during the night, more storms developed in a region of strong warm advection near a low level jet in excess of 50 knots. Marginal instability developed as a surface warm front lifted northward. This round of storms produced heavy rain and isolated flooding.

GIBSON COUNTY --- 2.0 S PATOKA [38.39, -87.58], 2.4 SSE PATOKA [38.39, -87.56], 1.6 SE PATOKA [38.41, -87.56], 0.8 S PATOKA [38.41, -87.58]

01/12/13 14:00 CST 10K Flash Flood (due to Heavy Rain)

01/12/13 16:00 CST 0 Source: Trained Spotter

Deep water was flowing across a couple of roads west of Paducah, including State Highway 305. Highway 994 was shut down in Paducah due to flash flooding. A vehicle that was unable to navigate a flooded intersection in Paducah ended up in a flooded ditch. In Paducah, floodwaters from Crooked Creek overtopped a bridge, closing the road. A garage was flooded in an urban area in Paducah. The 24-hour rainfall at the National Weather Service office in Paducah was 4.61 inches. A total of 1.40 inches fell within 40 minutes.

MCCRACKEN COUNTY --- 1.5 S LONE OAK [37.01, -88.67], 1.5 SE PADUCAH [37.06, -88.61]

01/12/13 14:40 CST 50K Thunderstorm Wind (EG 56 kt) 01/12/13 14:45 CST 0 Source: Trained Spotter

Several large trees up to three feet in diameter were blown down across portions of the south side of Paducah. A tree landed on a day care facility. At least a few homes had some shingles blown off. A couple of miles south of Lone Oak, there was damage at a nursery. Tree limbs were blown down, and a barn and greenhouse were damaged.

LIVINGSTON COUNTY --- 0.2 WSW HAMPTON [37.28, -88.37], 1.6 NE HAMPTON [37.30, -88.35]

A couple of secondary roads in the southern part of	of the county were impassabl	le due to flooding.		
During the afternoon, a supercell thunderstorm	dovoloped plana a sus-t -t-	ationom, fromt the	t ovtondod from	nuthweat to northoast

the development of the isolated supercell. Strong low and mid-level wind fields supported the formation of the supercell, which spawned an isolated EF-2 tornado in Livingston County.

Later on during the night, more storms developed in a region of strong warm advection near a low level jet in excess of 50 knots.

Marginal instability developed as a surface warm front lifted northward. This round of storms produced heavy rain and some flash

an expansive upper-level trough over the western and central states. Several weak disturbances tracked northeastward, contributing to

flooding.

A line of thunderstorms intensified as it moved east across southeast Missouri. The storms increased as they moved into slightly more unstable air associated with a strengthening low level jet. The storms were aided by the approach of a strong upper level trough. Despite weak instability, winds of 90 knots in the lowest 3 kilometers coupled with extreme shear values resulted in damaging winds and isolated tornadoes with the strongest storms. Ahead of the thunderstorms, strong southerly gradient winds gusted up to 45 mph, mainly in the Cape Girardeau to Sikeston area.
